PROFESSIONAL SUMMARY

Full-stack developer focused on rapid MVP development and SaaS product delivery. Proven ability to convert product ideas into working prototypes and production-ready applications quickly using Next.js, TypeScript, modern backend stacks, and fast infra tools. Experienced in owning features end-to-end, deploying independently, and iterating rapidly based on feedback in startup-style environments.

Product-focused engineer utilizing AI-augmented workflows (Copilot, Cursor) to accelerate development velocity by 30% while maintaining strict code quality standards. React-certified by **HackerRank**, **2-star** CodeChef programmer, and driven by a strong bias toward shipping, learning, and continuous improvement.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript.
Frontend: React.js, Tailwind CSS, Material UI, ShadCN, Redux, Zustand, TanStack Query.
Frameworks: NextJS, Electron (familiar).
Backend: Node.js, Express.js,
Databases & ORM: Supabase, MongoDB, PostgreSQL, Prisma, Redis, Mongoose.
Tools & Platforms: Vercel, OpenAI, AWS S3, Firebase, Figma, Docker, Nginx, PM2.

WORK EXPERIENCE

Level 7 Marketing Solutions   **Full-time | Dhaka, Bangladesh**
   Full-Stack Developer   **January 2024 – Present**

- Contributed to **6+ production-grade web applications** for commercial clients, delivering features across frontend, backend, and deployment pipelines in fast-paced sprint cycles.
- Built and maintained scalable, **responsive UI**s using **Next.js** and **TypeScript**, improving page load performance and overall usability across multiple client projects.
- Rapidly translated product requirements and design mockups into **working features and MVP-ready components**, reducing iteration time during early development phases.
- Implemented client-facing features involving **state management, form handling, authentication flows, and API integrations**, ensuring reliability in real-world usage.
- Worked in a **startup-style environment**, balancing clean code practices with aggressive delivery timelines.

PROJECTS

DevUtils – Developer Utility Tools
[Code](#)

- Built an **open-source**, **cross-platform** desktop app offering offline developer utilities using **Electron, React, and TypeScript**, developed with vibe coding and AI-assisted workflows.
- Rapidly prototyped and shipped features with a modern stack, optimizing for fast iteration and maintainability.
- Maintained the project during **Hacktoberfest**, reviewing and merging contributions from **~5 external developers**.
- Owned repository maintenance, including issue triage, PR reviews, and code quality enforcement.

Technologies used: Electron, React, TypeScript, Vite, Tailwind CSS, ShadCN.

SaaSify – AI SaaS Boilerplate
[Stage](#) | **[Code](#)**

- Built a **production-ready** AI SaaS boilerplate with Next.js 14, enabling rapid launch of subscription-based products with **authentication**, **payments**, and **AI features**.
- Implemented **end-to-end** SaaS foundations including Supabase authentication, OpenAI-powered chat, and Lemon Squeezy subscriptions.
- Focused on developer **experience** and **scalability**, providing a clean architecture suitable for real-world SaaS products.
- Designed a modern, responsive dashboard using **v0 by Vercel**, then refined and integrated it with Tailwind CSS and shadCN for rapid iteration and extensibility.

Technologies used: NextJS, TypeScript, Tailwind CSS, ShadCN, React Markdown, Zod, React Hook Form, OpenAI

Nirbhik.io - Insurance Aggregation Platform
[Stage](#)

- Advanced dynamic form system powered by schema-driven validation and **multi-step** adaptive flows.
- Implemented **multi-level permissions** for admins, agents, partners, and end users
- Utilized Zustand for predictable, **scalable** state handling and persistent multi-page flows.

Technologies used: NextJS, TypeScript, Tailwind CSS, ShadCN, Zod, React Hook Form, SSLCommerze

CERTIFICATES & ACHIEVEMENTS

- • Solved **300+ problems** on different online judges.
- • **3 Star Problem solver** at HackerRank.
- • **2 Star Coder** at CodeChef.
- • **Certified Frontend Developer** at HackerRank.

EDUCATION

Feni Govt Computer Institute
Diploma in Engineering in Computer Science & Technology
CGPA: 3.45
Completion Year: 2023
